

First Trust

First Trust was established in 1991 with a mission to offer investors a better way to invest. We are very proud that we continue to fulfill this mission and have built a firm of over 650 employees who concentrate on our mission every single day. First Trust's developers analyze systems and processes and deploy applications to help the firm succeed in all aspects of our business. We have built a very strong team through our belief that technology will help us to not only compete, but to win, in the fast-paced financial services space. As a developer at First Trust, you will work closely with various departments and product teams, and have the opportunity to work with, and learn from, experts in the field of finance, while enjoying a collaborative team-building environment.

PERKS AND CULTURE

- Health Coverage
- Wellness program
- Retirement plan
- Travel
- Community/social outreach

EXAMPLES OF INTERESTING PROJECTS

- Sales Team Automation - Sales developers assist our sales team by automating and supporting modern web applications.
- Sales & Expense Reporting - Developers design solutions that help automate sales and expense reporting.
- Mobile Development - There is a need to be able to access data while traveling. At First Trust we want to be a mobile application leader.
- Research - Develop quantitative analysis applications used to pick securities that will outperform market indices in various categories.
- Trading - Build securities trading systems to streamline the trading experience for our customers.
