EXAMPLES OF INTERESTING PROJECTS

Bloomberg’s R&D department is a global team of more than 3,000 software engineers and infrastructure architects responsible for creating the world’s premiere source for real-time and historical financial market data and analytics. The department is responsible for building and maintaining the Bloomberg Professional service, the world’s most trusted source for real-time and historical pricing, indicative data, reporting, research, estimates and analytics, as well as creating and maintaining other financial, legal, government and news applications. R&D tackles critical projects to keep today’s global markets operating smoothly, with the right information flowing to the right people at the right time. From central bankers to presidents, from analysts to CEO’s and individual investors, the world’s most influential people get their information from our platform. We build the right answer before most people are able to formulate the right question.
