

Facebook is actively looking for incredibly intelligent undergrad, masters and Ph.D. students for full-time positions and summer internships. Because we're growing so quickly, there is enormous opportunity for individuals to have an impact and to grow as our service and company grows. We have more than a billion users so far, but we have so much more to do and build... and that's where your kung fu comes into play.

PERKS AND CULTURE

- Competitive compensation
- Relocation packages
- Active recent graduate community
- Creative and casual environment
- Company events and social gatherings
- Employee referral bonus
- Top-of-the-line equipment
- Company-provided meals, snacks, and drinks
- Transportation passes, Facebook shuttle
- On-site gym
- Free laundry service
- Small teams, big impact

EXAMPLES OF INTERESTING PROJECTS

- Develop highly scalable classifiers and tools leveraging machine learning, data regression and rules based models
- Analyze and improve efficiency, scalability and stability of various system resources
- Design and implement software for effective management, automation, data collection, performance analysis, monitoring, alerting and root cause analysis
- Optimize our platform infrastructure to ensure that Facebook and external applications are fast and reliable
- Design and implement extremely high-volume, fault-tolerant, scalable server systems
