

Indeed is the #1 job search engine worldwide. Since 2004, Indeed has given job seekers free access to millions of jobs from thousands of company websites and job boards. Our core mission is to help people get jobs. To make this possible, we built an amazing platform that handles 5 billion job search queries from over 140 million unique visitors per month. This platform relies on a massive, distributed, location-aware storage of job and job seeker data. It delivers highly relevant search results to job seekers around the world in real-time using powerful, ad-hoc analytics. We are a fast-growing company that accomplished a lot with a small and focused team. We deliver 2+ million unique visitors per engineer, which is on par with industry leaders such as Facebook. We are going to accomplish even more as we continue to build more great products. Come join our team!
