

CS313K: Logic, Sets, and Functions

J Strother Moore
Department of Computer Sciences
University of Texas at Austin

Lecture 4 – Chap 2 (2.7, 2.8, 2.9, 2.10)

Announcements

If you have not registered your iclicker yet, do it before Saturday!

Turnin your homework to CS313K! Several of you have accidentally turned it in to CS307. No more excuses.

Put `(assign evalable-ld-printingp nil)` into your ACL2s script, e.g., `defuns.lisp`. This will make the object constructed by `(cons 1 (cons 2 (cons 3 nil)))` print as `(1 2 3)` instead of as `(list 1 2 3)`.
