

# CS313K: Logic, Sets, and Functions

J Strother Moore  
Department of Computer Sciences  
University of Texas at Austin

Lecture 28 – Chap 8 (8.9–8.14)

# Announcements

The syllabus mistakenly says there will be 27 quizzes. But there will only be 25. Thus, only 1220 points are possible (instead of 1240).

Your final percentage score will be your total accumulated point divided by 12.20 (instead of by 12.40).
