1. [6 Points] Draw the Conceptual and Logical Models as done in class for the diagram above.

Don’t worry about the 0 or 1 cardinality of Relationships, either is fine for the quiz.
3. [2 Points] Write a SELECT statement that returns the name, salary, and department number for employees in the scott/emp table where their manager is 7698

   SELECT ename, sal, deptno
   FROM emp
   WHERE mgr = 7698

4. [2 Points] What is the definition of a Relation in data management?

   A Relation is a subset of the cross product of a set of domains.
