

CS311H: Discrete Mathematics

Intro and Propositional Logic

Instructor: Işıl Dillig

Instructor: Işıl Dillig

CS311H: Discrete Mathematics Intro and Propositional Logic

1/36

Course Staff

- ▶ **Instructor:** Prof. Işıl Dillig
- ▶ **Teaching Assistants:** Varun Adiga, Akshay Gupta, Aditya Durvasula & Rohan Nair
- ▶ Class meets every Tuesday, Thursday 2:00 pm - 3:15 pm
- ▶ Course webpage: <http://www.cs.utexas.edu/~isil/cs311h/>
- ▶ Contains contact info, office hours, slides from lectures, homework assignments etc.

Instructor: Işıl Dillig

CS311H: Discrete Mathematics Intro and Propositional Logic

2/36

About this Course

- ▶ Give mathematical background you need for computer science
- ▶ **Topics:** Logic, proof techniques, number theory, combinatorics, graph theory, basic complexity theory ...
- ▶ These will come up again and again in higher-level CS courses
 - ▶ Master CS311H material if you want to do well in future courses!

Instructor: Işıl Dillig

CS311H: Discrete Mathematics Intro and Propositional Logic

3/36

Textbook

- ▶ Textbook (optional): Discrete Mathematics and Its Applications by Kenneth Rosen
- ▶ Textbook not a substitute for lectures:
 - ▶ Class presentation may not follow book
 - ▶ Skip many chapters and cover extra material

Instructor: Işıl Dillig

CS311H: Discrete Mathematics Intro and Propositional Logic

4/36

Piazza

- ▶ Piazza page: <https://piazza.com/utexas/fall2018/cs311h/home>
- ▶ Homework #0: Make sure you can access Piazza page!
- ▶ Please post class-related questions on Piazza instead of emailing instructor TA's
 - ▶ If something is not clear to you, it won't be to others either
 - ▶ You'll get answers a lot quicker
- ▶ Please use common sense when posting questions on Piazza
 - ▶ Hints/ideas ok, but cannot post full solutions!!

Instructor: Işıl Dillig

CS311H: Discrete Mathematics Intro and Propositional Logic

5/36

Discussion Sections and Office Hours

- ▶ Discussion sections on Fridays 12-1 pm and 1-2 pm in GDC 1.406
- ▶ Discussion section will answer questions, solve new problems, and go over previous homework
- ▶ Isil's office hours: Tuesdays & Thursdays after class until 4 pm
- ▶ TA office hours TBD

Instructor: Işıl Dillig

CS311H: Discrete Mathematics Intro and Propositional Logic

6/36

Requirements

- ▶ Weekly problem sets
- ▶ Three exams: in-class, closed-book
 - ▶ Allowed to bring 3 pages of **hand-prepared** notes
- ▶ Scheduled for **October 9**, **November 8**, and **December 6**
- ▶ No make-up exams given unless you have serious, documented medical emergency
- ▶ No final exam

Grading

- ▶ **Each exam**: 25% of final grade
- ▶ **Homework**: 25% of final grade
- ▶ Final grades may be curved, but lower bounds guaranteed (e.g., get at least A- if grade is 90% or higher)

Homework Policy

- ▶ Homework due at the **beginning** of class on due date
 - ▶ Late submissions not allowed, but lowest homework score dropped when calculating grades
- ▶ We will only give hard copies of homework solutions in class

Honor Code

- ▶ Homework write-up must be your **own**
- ▶ May not copy answers from on-line resources or other students
- ▶ If you discuss with others, write-up must mention their names
- ▶ Honor code taken very seriously at UT
 - ▶ May be expelled for violating honor code!
 - ▶ Please read departmental guidelines (link from course webpage)

Class Participation

- ▶ Everyone expected to attend lectures
 - ▶ Please do not use cell phone, laptop, or tablets during lecture!
- ▶ Ask questions!
 - ▶ No question is a stupid question!
 - ▶ Other students also benefit from your questions
- ▶ Make class fun by participating!
 - ▶ Might win chocolate if you answer questions :)

Let's get started!

Logic

- ▶ Logic: study of valid reasoning; fundamental to CS
- ▶ Allows us to represent knowledge in precise, mathematical way
- ▶ Allows us to make valid inferences using a set of precise rules
- ▶ **Many applications in CS:**
AI, programming languages, databases, computer architecture, algorithms, ...

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

13/36

Propositional Logic

- ▶ Simplest logic is **propositional logic**
- ▶ Building blocks of propositional logic are **propositions**
- ▶ A **proposition** is a statement that is either true or false
- ▶ Examples:
 - ▶ "CS311 is a course in discrete mathematics": **True**
 - ▶ "Austin is located in California": **False**
 - ▶ "Pay attention": **Not a proposition**
 - ▶ " $x+1=2$ ": **Not a proposition**

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

14/36

Propositional Variables, Truth Value

- ▶ Variables that represent propositions are called **propositional variables**
- ▶ Denote propositional variables using lower-case letters, such as $p, p_1, p_2, q, r, s, \dots$
- ▶ **Truth value** of a propositional variable is either T (i.e., true) or F (i.e., false)

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

15/36

Compound Propositions

- ▶ More complex propositions formed using **logical connectives** (also called **boolean connectives**)
- ▶ Three basic logical connectives:
 1. $\wedge$: **conjunction** (read "and"),
 2. $\vee$: **disjunction** (read "or")
 3. $\neg$: **negation** (read "not")
- ▶ Propositions formed using these logical connectives called **compound propositions**; otherwise **atomic propositions**
- ▶ A **propositional formula** is either an atomic or compound proposition

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

16/36

Negation

- ▶ Negation of a proposition p , written $\neg p$, represents the statement "It is not the case that p ".
- ▶ If p is T , $\neg p$ is F and vice versa.
- ▶ In simple English, what is $\neg p$ if p stands for ...
 - ▶ "Less than 80 students are enrolled in CS311H"?
- ▶ What is the truth value of $\neg p$?

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

17/36

Conjunction

- ▶ **Conjunction** of two propositions p and q , written $p \wedge q$, is the proposition " p and q "
- ▶ $p \wedge q$ is T if **both** p is true **and** q is true, and F otherwise.
- ▶ What is the conjunction and the truth value of $p \wedge q$ for ...
 - ▶ p = "It is fall semester", q = "Today is Thursday" ?

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

18/36

Disjunction

- ▶ **Disjunction** of two propositions p and q , written $p \vee q$, is the proposition " p or q "
- ▶ $p \vee q$ is T if **either** p is true **or** q is true, and F otherwise.
- ▶ What is the truth value of $p \vee q$ for ...
 - ▶ p = "It is spring semester", q = "Today is Tuesday"?

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

19/36

Propositional Formulas and Truth Tables

- ▶ **Truth table** for propositional formula F shows truth value of F for every possible value of its constituent atomic propositions

- ▶ **Example:** Truth table for $\neg p$

p	$\neg p$
T	F
F	T

- ▶ **Example:** Truth table for $p \vee q$

p	q	$p \vee q$
T	T	T
T	F	T
F	T	T
F	F	F

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

20/36

Examples

Construct truth tables for the following formulas:

1. $(p \vee q) \wedge \neg p$
2. $(p \wedge q) \vee (\neg p \wedge \neg q)$
3. $(p \vee q \vee \neg r) \wedge r$

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

21/36

More Logical Connectives

- ▶ $\wedge, \vee, \neg$ most common boolean connectives, but there are other boolean connectives as well
- ▶ Other connectives: **exclusive or** $\oplus$, **implication** $\rightarrow$, **biconditional** $\leftrightarrow$
- ▶ **Exclusive or:** $p \oplus q$ is true when exactly one of p and q is true, and false otherwise

- ▶ Truth table:

p	q	$p \oplus q$
T	T	F
T	F	T
F	T	T
F	F	F

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

22/36

Implication (Conditional)

- ▶ An **implication** (or conditional) $p \rightarrow q$ is read "if p then q " or " p implies q "
- ▶ It is false if p is true and q is false, and true otherwise
- ▶ **Exercise:** Draw truth table for $p \rightarrow q$
- ▶ **Intuition:** Consider the sentence "If you score 90%, then you will get an A". Did I break my promise if you score 80% and you don't get an A?
- ▶ In an implication $p \rightarrow q$, p is called **antecedent** and q is called **consequent**

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

23/36

Converting English into Logic

Let p = "I major in CS" and q = "I will find a good job". How do we translate following English sentences into logical formulas?

- ▶ "If I major in CS, then I will find a good job":
- ▶ "I will not find a good job unless I major in CS":
- ▶ "It is sufficient for me to major in CS to find a good job":
- ▶ "It is necessary for me to major in CS to find a good job":

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

24/36

More English - Logic Conversions

Let $p =$ "I major in CS", $q =$ "I will find a good job", $r =$ "I can program". How do we translate following English sentences into logical formulas?

- ▶ "I will not find a good job unless I major in CS or I can program":
- ▶ "I will not find a good job unless I major in CS and I can program":
- ▶ "A prerequisite for finding a good job is that I can program":
- ▶ "If I major in CS, then I will be able to program and I can find a good job":

Instructor: Işıl Dillig,

CS311H: Discrete Mathematics Intro and Propositional Logic

25/36

Converse of a Implication

- ▶ The **converse** of an implication $p \rightarrow q$ is $q \rightarrow p$.
- ▶ What is the converse of "If I am a CS major, then I can program"?
- ▶ What is the converse of "If I get an A in CS311, then I am smart"?
- ▶ **Question:** Is it possible for a implication to be true, but its converse to be false?

Instructor: Işıl Dillig,

CS311H: Discrete Mathematics Intro and Propositional Logic

26/36

Inverse of an Implication

- ▶ The **inverse** of an implication $p \rightarrow q$ is $\neg p \rightarrow \neg q$.
- ▶ What is the inverse of "If I am a CS major, then I can program"?
- ▶ What is the inverse of "If I get an A in CS311, then I am smart"?
- ▶ **Note:** It is possible for a implication to be true, but its inverse to be false. $F \rightarrow T$ is true, but inverse is false

Instructor: Işıl Dillig,

CS311H: Discrete Mathematics Intro and Propositional Logic

27/36

Contrapositive of Implication

- ▶ The **contrapositive** of an implication $p \rightarrow q$ is $\neg q \rightarrow \neg p$.
- ▶ What is the contrapositive of "If I am a CS major, then I can program"?
- ▶ What is the contrapositive of "If I get an A in CS311, then I am smart"?
- ▶ **Question:** Is it possible for an implication to be true, but its contrapositive to be false?

Instructor: Işıl Dillig,

CS311H: Discrete Mathematics Intro and Propositional Logic

28/36

Conditional and its Contrapositive

A conditional $p \rightarrow q$ and its contrapositive $\neg q \rightarrow \neg p$ always have the same truth value.

- ▶ Prove it!

Instructor: Işıl Dillig,

CS311H: Discrete Mathematics Intro and Propositional Logic

29/36

Question

- ▶ Given $p \rightarrow q$, is it possible that its converse is true, but inverse is false?

Instructor: Işıl Dillig,

CS311H: Discrete Mathematics Intro and Propositional Logic

30/36

Summary

- ▶ Conditional is of the form $p \rightarrow q$
- ▶ **Converse:** $q \rightarrow p$
- ▶ **Inverse:** $\neg p \rightarrow \neg q$
- ▶ **Contrapositive:** $\neg q \rightarrow \neg p$
- ▶ Conditional and contrapositive have same truth value
- ▶ Inverse and converse always have same truth value

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

31/36

Biconditionals

- ▶ A **biconditional** $p \leftrightarrow q$ is the proposition "p if and only if q".
- ▶ The biconditional $p \leftrightarrow q$ is true if p and q have same truth value, and false otherwise.
- ▶ **Exercise:** Construct a truth table for $p \leftrightarrow q$
- ▶ **Question:** How can we express $p \leftrightarrow q$ using the other boolean connectives?

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

32/36

Operator Precedence

- ▶ Given a formula $p \wedge q \vee r$, do we parse this as $(p \wedge q) \vee r$ or $p \wedge (q \vee r)$?
- ▶ Without settling on a convention, formulas without explicit paranthesization are ambiguous.
- ▶ To avoid ambiguity, we will specify **precedence** for logical connectives.

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

33/36

Operator Precedence, cont.

- ▶ Negation ($\neg$) has **higher precedence** than all other connectives.
- ▶ **Question:** Does $\neg p \wedge q$ mean (i) $\neg(p \wedge q)$ or (ii) $(\neg p) \wedge q$?
- ▶ Conjunction ($\wedge$) has next highest precedence.
- ▶ **Question:** Does $p \wedge q \vee r$ mean (i) $(p \wedge q) \vee r$ or (ii) $p \wedge (q \vee r)$?
- ▶ Disjunction ($\vee$) has third highest precedence.
- ▶ Next highest precedence is $\rightarrow$, and lowest precedence is $\leftrightarrow$

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

34/36

Operator Precedence Example

- ▶ Which is the correct interpretation of the formula

$$p \vee q \wedge r \leftrightarrow q \rightarrow \neg r$$

- (A) $((p \vee (q \wedge r)) \leftrightarrow q) \rightarrow (\neg r)$
- (B) $((p \vee q) \wedge r) \leftrightarrow q \rightarrow (\neg r)$
- (C) $(p \vee (q \wedge r)) \leftrightarrow (q \rightarrow (\neg r))$
- (D) $(p \vee ((q \wedge r) \leftrightarrow q)) \rightarrow (\neg r)$

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

35/36

Summary

- ▶ Formulas in propositional logic are formed using propositional variables and boolean connectives
- ▶ **Connectives:** negation $\neg$, conjunction $\wedge$, disjunction $\vee$, conditional $\rightarrow$, biconditional $\leftrightarrow$
- ▶ Truth table shows truth value of formula under all possible assignments to variables

Instructor: Işıl Dillig.

CS311H: Discrete Mathematics Intro and Propositional Logic

36/36
