CS344M
Autonomous Multiagent Systems
Spring 2008

Prof: Peter Stone

Department of Computer Sciences
The University of Texas at Austin
Good Afternoon, Colleagues

Are there any questions?
Logistics

- Final reports due to me on Thursday
- Just one point off if turned in at my office by Friday at 3:30pm
  - Only if you’re in class on Thursday!
Discussion

• Should agents model emotions?
Discussion

The Turing Test
Course recap

- You’ve read.
Course recap

- You’ve read.
- You’ve reacted and formed opinions.

Do you like CS research?
What have we covered?

1. Autonomous agents: What is an agent?
What have we covered?

1. Autonomous agents: What is an agent?
2. Agent architectures: Subsumption, TCA
What have we covered?

1. Autonomous agents: What is an agent?
2. Agent architectures: Subsumption, TCA
3. Multiagent Systems: Overview, subsumption

What have we covered?

1. Autonomous agents: What is an agent?
2. Agent architectures: Subsumption, TCA
3. Multiagent Systems: Overview, subsumption
4. Communication and Teamwork: KQML, Joint Intentions
5. RoboCup case studies
What have we covered?

1. **Autonomous agents:** What is an agent?
2. **Agent architectures:** Subsumption, TCA
3. **Multiagent Systems:** Overview, subsumption
4. **Communication and Teamwork:** KQML, Joint Intentions
5. **RoboCup case studies**
6. **Swarms and ant-based approaches:** “Go to the Ant”

13. **Multiagent learning:** multiagent RL
14. **Entertainment agents** chatbots, music bots
The original question

- What is an agent?
Course recap

• I’ve been impressed by the levels of discussions we’ve had in class

• I’m happy with the progress in writing and speaking that many of you have made

• I’m proud of all of you for sticking with it through such a demanding course
