Milestone 10 - Week of 12/10*.

*Refer to the [Presentation Schedule](#) for timing and location details.

- With your partner, give a 15-minute presentation of your project.
- Present your chosen datasets and what questions/areas of interest you chose to study.
- Present your solution that includes your SQL transforms, Beam transforms, views, and visualizations.
- Show a working demo of your solution that conveys useful information.
- Explain how your solution could be improved upon as future work.
- Respond to audience questions accurately and clearly.
- Respond to audience objections by defending your solution.
- Share your presentation slides immediately after your presentation. You should have 7-10 slides saved as `slides.pdf` and pushed to your group's GitHub repo.

CS 327E Milestone 10 Rubric
Due Dates: 12/10/18 - 12/14/18

Presentation criteria - make sure you cover **at least**: ● your datasets ● 2 cross dataset queries and 2 pipelines ● your SQL from your views, along with a dissection of how they work ● your intended problem/question to answer ● your solution ● a live demonstration of your solution ● future improvements to your solution (what you may need to answer the question better, etc.) ● end-of-presentation questions from the instructors	100
Push your presentation slides to your repository as `slides.pdf`. Your presentation **will not** be graded without this file in your repository.	Required
Total Credit:	**100**
