

Database Creation - 2/6

Announcements

- Next class is only a setup class (Prof will not be here). No reading quiz.
- Grades released tonight or tomorrow.

Reading Quiz

- Q4: TRUNCATE removes all the rows of data but not the actual table. DROP removes all the data and the table as well.

Creating Tables

- Remember to put NOT NULL and UNIQUE constraints if the column requires one.
- To create a primary key column use PRIMARY KEY.
- To create a foreign key column use REFERENCE and then the Table(column).

Remember: Connect to postgres database first to be able to create other databases.

Next Class

Only for setup help.
