# 0. Dry Run

Program Name: DryRun.java Input File: dryrun.dat

Write a program that reads a list of items from the input file and outputs a message for each.

#### Input

The first line contains an integer n that indicates how many items are in the input file. The next n lines contain a single word. Each word represents an item that you like.

### Output

For each item in the input, output a line stating, "I like <item>.". For example, if the item were cabbage, the program would output the line, "I like cabbage."

### **Example Input File**

4 cabbage contests judges everything

## **Example Output To Screen**

I like cabbage.
I like contests.
I like judges.
I like everything.
