

ARISTA

Arista Networks is a leader in building scalable, high-performance and ultra-low latency cloud networks. Arista was founded to pioneer software-driven cloud networking solutions for large data center storage and computing environments. Arista's award-winning platforms, ranging in Ethernet speeds from 10 to 100 gigabits per second, redefine scalability, agility and resilience. Arista has shipped more than 15 million cloud networking ports worldwide with CloudVision and EOS, an advanced network operating system. Committed to open standards, Arista is a founding member of the 25/50GbE consortium.

PERKS AND CULTURE

- Competitive compensation
- Health Coverage and wellness program
- Retirement plan
- Employee Stock Purchase Plan (ESPP)
- Community/social outreach
- Company outings and events
- Hackathons
- Snacks and drinks
- Small teams and end to end project ownership
- Large recent grad and intern community

CURRENT OPPORTUNITIES:

EXAMPLES OF INTERESTING PROJECTS

- Arista EOS, is the most advanced network operating system to enable open third party development. The award-winning software is built upon a stable, open source Linux core with a central state-oriented database that makes EOS inherently self-healing, in-service upgradeable and extremely robust.
- CloudVision, the industry's first cognitive management plane (CMP) cluster, is a new industry-wide approach to network management. CloudVision harnesses the capabilities of cloud computing, big data and machine learning, collecting and archiving all network state over all time, and running a suite of applications providing visibility, automating deployment, and reporting and analyzing important events.
