

Software is changing the world, and we're at the center of it all. With a customer list that reads like a who's who in tech, and a highly disruptive business model, we're advancing the art of team collaboration with products like JIRA, Confluence, BitBucket, HipChat, and now Trello. Driven by honest values, an amazing culture, and consistent revenue growth, we're out to unleash the potential of every team. From Amsterdam and Austin to Sydney and San Francisco, we're looking for people who are powered by passion and eager to do the best work of their lives in a highly autonomous yet collaborative, no B.S. environment.

EXAMPLES OF INTERESTING PROJECTS

- There many opportunities to make a huge impact in Engineering, whether crafting elegant JavaScript, building mobile apps, or architecting a scalable cloud platform with micro-services on AWS, our engineering team creates products that help teams build whatever they imagine.
- Check out what some of our teams are up to:
- Join our Platform as a Service (PaaS) team & help build the infrastructure that enables hundreds of Atlassians to deploy and operate applications in the cloud. Here, you'll collaborate with experienced and curious engineers to build the platform that powers Atlassian's Cloud products.
- Be a part of Confluence, our project management tool, where you'll be directly impacting the customer experience through the design and implementation of new features and functionalities.
- Mobile Core works together to oversee architectural standards, best practices, tooling and the build out of shared components across all Atlassian mobile apps.
- Join Bitbucket, and work on a fast-paced team that's building the future of code collaboration. You'll be empowered to dream up and develop new features for Bitbucket & make millions of developers around the world more productive.
- Join Atlassian Ecosystems, where you can build new integrations between Atlassian systems and third party vendor systems. A lot of the work is greenfield, where you can get to work on new integrations and start up new services.
