

EOG prides itself on being data-driven technology innovators. We have the atmosphere of a startup and a team of creative, best-in-class individuals pushing the boundaries on various technology fronts. Our business-focused employees in the IS department develop proprietary in-house web, mobile & desktop applications that directly impact our business. Our mobile applications give EOG employees a “control room in their pocket” that supports decentralized decision-making. EOG’s custom machine learning algorithms, real time apps & big data analytics are helping drive our industry leading performance! At EOG, everyone contributes, everyone wins. Working here is never boring – every day, there is a new business problem to solve or new technology to learn.
