

At the new General Motors, we are passionate about designing, building and selling the world's best vehicles. This vision unites us as a team each and every day and is the hallmark of our customer-driven culture.

Making the world's best vehicles can only happen with the world's greatest employees. We take great pride in our work, and take great care to deliver exceptional cars and a positive ownership experience to our customers around the world.

General Motors continues to develop innovative technologies to shape the future of the automotive industry.

We are expanding our leadership in vehicle electrification with advancements in batteries, electric motors and power controls. The GM team is also working on a range of high-volume, fuel-saving technologies including direct injection, variable valve timing, turbo-charging, six-speed transmissions, diesel engines, and improved aerodynamic designs.

We continue to create and leverage strategic global partnerships to bring new vehicles and technologies to customers faster. We also established GM Ventures to help the company identify and develop innovative technologies by exploring equity investments in new auto-related technologies.
