

As the leading provider of Application Performance Management solutions for containerized microservice applications, Instana applies automation and artificial intelligence to deliver the visibility needed to effectively manage the performance of today's dynamic applications across the DevOps lifecycle. Founded by Application Monitoring veterans, Instana provides true AI-powered APM to help organizations deliver high performance applications today and in the future.

PERKS AND CULTURE

- Paid leave sabbaticals
- Health Coverage
- Wellness program
- Employee Stock Purchase Plan (ESPP)
- Employer-sponsored life insurance
- Employer-sponsored short & long term disability insurance
- Flexible work-from-home policy
- Home-office allowance

EXAMPLES OF INTERESTING PROJECTS

- At Instana, we have a myriad of complex and interesting projects to work on; from our agent software that has ridiculous performance requirements, to a big data processing pipeline (currently processing multiple petabytes of data every day), and from a fully 3D rendered web UI, to state of the art machine learning algorithms for detecting and predicting anomalies.
