

NIANTIC

At Niantic, we've built the world's only planet-scale augmented reality platform for current and future generations of augmented reality hardware. Our engineering team is tackling the hardest challenges in high performance cloud applications operating at massive scale, machine learning, computer vision, and augmented reality. We are building genre-defining real world games that are moving an entire industry towards the future. Come join our world class team, and experience the joy of creating products and services that touch hundreds of millions of people — and help make the Earth the new game board.

PERKS AND CULTURE

- 100% of premiums for long term and short term disability and life insurance
- Unlimited sick time
- Paid time off
- Breakfast lunch and snacks all day every day
- Referral bonuses
- Stock options
- Volunteer off-sites
- Affinity Groups
- 401k Match
- Cell-phone gym and internet stipend

EXAMPLES OF INTERESTING PROJECTS

- We're the leader in the Augmented Reality space. Pokemon Go was the first big application in this space and there are now Pokemon Go meetups and events happening across the world. The user base remains engaged as we keep releasing new features and we're at over 500 million downloads. Our second game, Ingress, has tens of millions of users and over 20 million downloads. We know how to build successful and engaging games. We are now partnering with Warner Brothers to introduce our newest AR game: Harry Potter: Wizards Unite.
