

We are the global cybersecurity leader, known for always challenging the security status quo. Our mission is to protect our way of life in the digital age by preventing successful cyberattacks. This has given us the privilege of safely enabling tens of thousands of organizations and their customers. Our pioneering Security Operating Platform safeguards your digital transformation with continuous innovation that combines the latest breakthroughs in security, automation, and analytics. By delivering you a true platform and empowering a growing ecosystem of change-makers like us, we provide you highly effective and innovative cybersecurity across clouds, networks, and mobile devices. Across the world, customers love our security and consistently award us the highest loyalty ratings and net promoter scores in the industry.

EXAMPLES OF INTERESTING PROJECTS

- Develop and deliver next generation technologies within our Application Framework team bringing large scale cloud-based infrastructure data processing and security disciplines together that ingest exabytes of data to solve real world problems.
- Develop highly scalable machine learning based solutions to address cyber security challenges.
- Build large scale distributed systems in Java, Python and other languages using open source technologies.
- Work with our malware research teams to build next generation threat prevention and antivirus solutions spanning IoT, web and network security.
- Build and develop the software and hardware for our market leading Next Generation Firewalls. Our firewalls are delivered from the cloud, virtually (as part of our VM series) and as our traditional bare metal product.
