

RetailMeNot

Want your code to be used by millions of deal-seeking shoppers? RetailMeNot is actively looking for top undergrad computer scientists for summer internships and fulltime positions. We're a team of top-notch engineers ready to help launch your career as you own and deliver challenging technical work.

EXAMPLES OF INTERESTING PROJECTS

- At RetailMeNot you will work on meaningful projects and be encouraged to innovate and explore disruptive new technologies. Tenacity is a core value - we work hard, always think about growth and go beyond the status quo. Recent projects include:
- Recommendation Engine - combines a graph database with word2vec and other machine learning techniques to improve recommendations and engage users with personalized content.
- Android App Homepage - major redesign to be faster, clearer, and show more content to the several million users of the RMN Android app.
- Product Details Chatbot - provides a familiar and interactive experience for users contacting RMN via chat. Uses NLP & ML API's to generate responses to users' messages.
- Mall Mode - iOS app enhancement with supporting back end services to enable new geo-targeted features for deal-seeking shoppers inside malls.
