

When it comes to developing state-of-the-art software solutions that touch 370,000+ associates and millions of customers worldwide, The Home Depot Austin Technology Center relies heavily on our talented and innovative Software Engineers. By leveraging emerging tools and technologies to support our dynamic, iterative development practices, our Software Engineers are consistently challenged to design and deliver industry-leading software and applications that are central to our success. By leveraging our collective team knowledge and experience with everything from information retrieval, distributed computing, and large-scale system design, to networking, security, and user interface design, we encourage creative, customer-driven solutions to be developed in a fast-paced, collaborative environment. As our business continues to grow and evolve, our versatile Software Engineers are entrusted with the responsibility to develop strategies and solutions to solve real-world problems while driving technology forward.
