

SerpApi enables companies, researchers, and developers to instantly access structured search engine data without dealing with the challenges of scraping. Our API powers thousands of AI and analytics applications around the world. We are a lean, engineering driven team based in Austin, and we love working with students who enjoy backend systems, distributed infrastructure, and solving meaningful data problems.

## PERKS AND CULTURE

- Health Coverage
- Travel
- Community/ Social Outreach
- High compensation and global career opportunities
- Profit share bonuses for all full-time team members
- Clear internal career growth paths and learning support
