Working Group Reports

<i>Developing laboratories for the SIGCSE Computing Laboratory Repository: guidelines, recommendations, and sample labs</i>	1
Report of the ITiCSE'97 Working Group on Designing Laboratory Materials for Computing Courses	
<i>Using the WWW as the delivery mechanism for interactive, visualization-based instructional modules</i>	13
Report of the ITiCSE'97 Working Group on Visualization	
<i>The Web and distance learning: what is appropriate and what is not</i>	27
Report of the ITiCSE'97 Working Group on the Web and Distance Learning	
<i>Using information technology to integrate social and ethical issues into the computer science and information systems curriculum</i>	38
Report of the ITiCSE'97 Working Group on Social and Ethical Issues in Computing Curricula	
<i>Computer-mediated communication in collaborative educational settings</i>	51
Report of the ITiCSE'97 Working Group on CMC in Collaborative Educational Settings	
<i>Harnessing technology for effective inter- and intra-institutional collaboration</i>	70
Report of the ITiCSE'97 Working Group on Supporting Inter- and Intra-institutional Collaboration	
<i>Historical perspectives on the computing curriculum</i>	94
Report of the ITiCSE'97 Working Group on Historical Perspectives in Computing Education	

Supplemental Proceedings

Keynote presentations

<i>The emergence of sophisticated distributed teaching and learning environments</i>	112
H. Maurer, Graz University of Technology, Austria	
<i>The case for integrating ethical and social impact into the computer science curriculum</i>	114
C. Dianne Martin, The George Washington University, USA	
<i>Technology in computing education: yet another bandwagon?</i>	121
Joe Turner, Clemson University, USA	

Papers and panel

<i>Programming practical work and problem sessions via the Internet</i>	125
Marian Petre and Blaine Price, The Open University, UK	

<i>The automatic assessment of Z specifications</i>	129
Eric Foxley, Omar Salman, and Zarina Shukur, The Univeristy of Nottingham, UK	
<i>Evaluation software: improving consistency and reliability of performance rating</i>	132
Jon Anderson Preston, Georgia Institute of Technology, USA	
<i>Forms of assessment that develop communication skills in Computer Science and Mathematics — a case study</i>	135
Anders Tengstrand and Mathias Hedenborg, Växjö University, Sweden	
<i>Computer science unit management challenges in the “enwebbed” age</i>	137
Maria Jean Hall and Timo Vuori, Edith Cowan University, Australia	
<i>Panel report: Using Java in computer science education</i>	140
Nan C. Schaller (Moderator), Rochester Institute of Technology, USA	
Michael Berman, Rowan University, USA	
Judith Bishop, University of Pretoria, South Africa	
Paddy Nixon, Trinity College, Ireland	
Evelyn Rozanski, Rochester Institute of Technology, USA	
Peter Welch, University of Kent, UK	
 Posters and demonstrations	
<i>Effective organization and management of computer science curriculum with world wide web — schematic model presentation</i>	144
Dennis Anderson, St. Francis College, USA	
<i>Using of computing curricula 1991 for transition from "Mathematics" to "Applied Mathematics and Computer Science" baccalaureate programme</i>	144
Iouri A. Bogoiavlenski, Andrew A. Pechnikov, Gennady S. Sigovtsev and Anatoly V. Voronin, * University of Petrozavodsk, Russia, ** GruppvaruExperterna i Sverige AB, Sweden	
<i>Integrating courseware into collaborative learning environments</i>	145
Safia Barikzai, South Bank University, UK	
<i>LINK: a software package for discrete mathematics and algorithms</i>	145
Jonathan Berry, Elon College, USA	
<i>A philosophy of teaching Java</i>	146
Judith M. Bishop, University of Pretoria, South Africa	
<i>A single-sex programme in computer science and engineering</i>	146
Gerd Brandell, Svante Carlsson, Håkan Ekblom and Ann-Charlotte Nord, Luleå University, Sweden	
<i>Networked PBL teaching the teacher on flexible learning</i>	147
Rolf Carlsson*, Göran Karlsson**, and Bengt Olsen***, * Datakonsult AB, Sweden, ** The Royal Institute of Technology, Stockholm, Sweden, *** GruppvaruExperterna i Sverige AB, Sweden	
<i>Using Emil Post's machine for an introduction to formal programming</i>	147
V. Dagdilelis and M. Satratzemi, University of Macedonia, Greece	

<i>Virtual office hours</i>	147
Douglas D. Dankel II and James Hearn, University of Florida, USA	
<i>Detecting plagiarism in introductory programming courses</i>	148
Monika Danielsson, Uppsala University, Sweden	
<i>SEDA, an advanced software tool in its generation: developing a Windows tutor using SEDA versus a classical programming approach</i>	148
P. Domingo*, A. García-Crespo*, V. Martínez-Orga**, M. Lancha*, B. Ruiz**, *University Carlos III de Madrid, Spain, **University Politecnica Superior de Madrid, Spain	
<i>Teletutor workbench for Internet distance learning environment</i>	149
Tatiana Gavrilova, Tatiana Sankina and S. Udaltsov, State Technical University, St. Petersburg, Russia	
<i>WebCT, a tool for the creation of sophisticated web-based learning environments</i>	149
Murray W. Goldberg, University of British Columbia, Canada	
<i>A language independent plagiarism detection system</i>	149
Ricardo Jiménez-Peris and Marta Patiño-Martínez, Universidad Politecnica de Madrid, Spain	
<i>Visual HIPE: A prototype for the graphical visualization of functional expressions</i>	149
Ricardo Jiménez-Peris*, C. Pareja-Flores**, Marta Patiño-Martínez* and J. A. Velazquez-Iturbide*, * Politecnica de Madrid, Spain, ** Universidad Complutense de Madrid, Spain	
<i>On mathematical assistant CARANT-REDUCE and its application to computer science education</i>	150
Nikolaj M. Glazunov, Glushkov Institute of Cybernetics NAS and International Solomon University, Ukraine	
<i>Demonstration laboratory materials for computation in algebra and informatik (computer science)</i>	150
Nikolaj M. Glazunov, Glushkov Institute of Cybernetics NAS and International Solomon University, Ukraine	
<i>The SIGCSE Computing Laboratory Repository</i>	151
Deborah L. Knox, The College of New Jersey, USA	
<i>Virtual school project for professional IT teachers in Latvia</i>	151
Aija Kukuka, Ivars Opelts and Dzintars Tomsons, Liepaja Pedagogical Higher School, Latvia	
<i>Computer science as an integrated part of engineering education</i>	151
Patrick Lambrix, Maud Göthe Lundgren, and Mariam Kamkar, Linköping University, Sweden	
<i>Algorithm demonstrations using Java</i>	151
Pamela B. Lawhead, The University of Mississippi, USA	
<i>The evaluation of computer science education in Europe</i>	152
Patricia Magee and Mícheál Ó'héigeartaigh, Dublin City University, Ireland	

<i>Animation of algorithms with Eliot and Jeliot</i>	152
Janne Markkanen*, Erkki Rautama*, Erkki Sutinen*, Jorma Tarhio** and Tommi Teräsvirta*, * University of Helsinki, Finland, ** University of Joensuu, Finland	
<i>Three-level teaching material and its implementation in a teaching situation</i>	153
Jorma Sajaniemi and Marja Kopponen, University of Joensuu, Finland	
<i>SHOW: a system for the presentation of three-level teaching material during lectures</i>	153
Jorma Sajaniemi and Marja Kopponen, University of Joensuu, Finland	
<i>Distance education by distance education</i>	153
Harriet G. Taylor, Louisiana State University, USA	
Author index	154
