UT Austin Villa 2012 - 2013

◆□ > ◆□ > ◆豆 > ◆豆 > ̄豆 = のへで

Introduction

We focus on our improvements to object detection.

- Candidate comparison is a crucial piece of object detection
- Our original method compares attributes sequentially
- Gaussian fitness functions enable parallel evaluation

크

Parallel Parameter Evaluation

Blue bars are readings, red lines are thresholds.

Solution Method Example

Solution: Multivariate Gaussian Fitness Functions

Sanity checks are performed simultaneously

・ロン ・回 と ・ ヨン ・ ヨン
