

UIL COMPUTER SCIENCE WRITTEN TEST

2025 INVITATIONAL A

JANUARY 2025

General Directions (Please read carefully!)

1. DO NOT OPEN THE EXAM UNTIL TOLD TO DO SO.
2. There are 40 questions on this contest exam. You will have 45 minutes to complete this contest.
3. All answers must be legibly written on the answer sheet provided. Indicate your answers in the appropriate blanks provided on the answer sheet. Clean erasures are necessary for accurate grading.
4. You may write on the test packet or any additional scratch paper provided by the contest director, but NOT on the answer sheet, which is reserved for answers only.
5. All questions have ONE and only ONE correct answer. There is a 2-point penalty for all incorrect answers.
6. Tests may not be turned in until 45 minutes have elapsed. If you finish the test before the end of the allotted time, remain at your seat and retain your test until told to do otherwise. You may use this time to check your answers.
7. If you are in the process of actually writing an answer when the signal to stop is given, you may finish writing that answer.
8. All provided code segments are intended to be syntactically correct, unless otherwise stated. You may also assume that any undefined variables are defined as used.
9. A reference to many commonly used Java classes is provided with the test, and you may use this reference sheet during the contest. AFTER THE CONTEST BEGINS, you may detach the reference sheet from the test booklet if you wish.
10. Assume that any necessary import statements for standard Java SE packages and classes (e.g., `java.util`, `System`, etc.) are included in any programs or code segments that refer to methods from these classes and packages.
11. NO CALCULATORS of any kind may be used during this contest.

Scoring

1. Correct answers will receive **6 points**.
2. Incorrect answers will lose **2 points**.
3. Unanswered questions will neither receive nor lose any points.
4. In the event of a tie, the student with the highest percentage of attempted questions correct shall win the tie.

STANDARD CLASSES AND INTERFACES – SUPPLEMENTAL REFERENCE

package java.lang

```
class Object
    boolean equals(Object anotherObject)
    String toString()
    int hashCode()

interface Comparable<T>
    int compareTo(T anotherObject)
        Returns a value < 0 if this is less than anotherObject.
        Returns a value = 0 if this is equal to anotherObject.
        Returns a value > 0 if this is greater than anotherObject.

class Integer implements Comparable<Integer>
    Integer(int value)
    int intValue()
    boolean equals(Object anotherObject)
    String toString()
    String toString(int i, int radix)
    int compareTo(Integer anotherInteger)
    static int parseInt(String s)

class Double implements Comparable<Double>
    Double(double value)
    double doubleValue()
    boolean equals(Object anotherObject)
    String toString()
    int compareTo(Double anotherDouble)
    static double parseDouble(String s)

class String implements Comparable<String>
    int compareTo(String anotherString)
    boolean equals(Object anotherObject)
    int length()
    String substring(int begin)
        Returns substring(begin, length()).
    String substring(int begin, int end)
        Returns the substring from index begin through index (end - 1).
    int indexOf(String str)
        Returns the index within this string of the first occurrence of str. Returns
        -1 if str is not found.
    int indexOf(String str, int fromIndex)
        Returns the index within this string of the first occurrence of str, starting
        the search at fromIndex. Returns -1 if str is not found.
    int indexOf(int ch)
    int indexOf(int ch, int fromIndex)
    char charAt(int index)
    String toLowerCase()
    String toUpperCase()
    String[] split(String regex)
    boolean matches(String regex)
    String replaceAll(String regex, String str)

class Character
    static boolean isDigit(char ch)
    static boolean isLetter(char ch)
    static boolean isLetterOrDigit(char ch)
    static boolean isLowerCase(char ch)
    static boolean isUpperCase(char ch)
    static char toUpperCase(char ch)
    static char toLowerCase(char ch)

class Math
    static int abs(int a)
    static double abs(double a)
    static double pow(double base, double exponent)
    static double sqrt(double a)
    static double ceil(double a)
    static double floor(double a)
    static double min(double a, double b)
    static double max(double a, double b)
    static int min(int a, int b)
    static int max(int a, int b)
    static long round(double a)
    static double random()
        Returns a double greater than or equal to 0.0 and less than 1.0.
```

package java.util

```
interface List<E>
class ArrayList<E> implements List<E>
    boolean add(E item)
    int size()
    Iterator<E> iterator()
    ListIterator<E> listIterator()
    E get(int index)
    E set(int index, E item)
    void add(int index, E item)
    E remove(int index)

class LinkedList<E> implements List<E>, Queue<E>
    void addFirst(E item)
    void addLast(E item)
    E getFirst()
    E getLast()
    E removeFirst()
    E removeLast()

class Stack<E>
    boolean isEmpty()
    E peek()
    E pop()
    E push(E item)

interface Queue<E>
class PriorityQueue<E>
    boolean add(E item)
    boolean isEmpty()
    E peek()
    E remove()

interface Set<E>
class HashSet<E> implements Set<E>
class TreeSet<E> implements Set<E>
    boolean add(E item)
    boolean contains(Object item)
    boolean remove(Object item)
    int size()
    Iterator<E> iterator()
    boolean addAll(Collection<? extends E> c)
    boolean removeAll(Collection<?> c)
    boolean retainAll(Collection<?> c)

interface Map<K,V>
class HashMap<K,V> implements Map<K,V>
class TreeMap<K,V> implements Map<K,V>
    Object put(K key, V value)
    V get(Object key)
    boolean containsKey(Object key)
    int size()
    Set<K> keySet()
    Set<Map.Entry<K, V>> entrySet()

interface Iterator<E>
    boolean hasNext()
    E next()
    void remove()

interface ListIterator<E> extends Iterator<E>
    void add(E item)
    void set(E item)

class Scanner
    Scanner(InputStream source)
    Scanner(String str)
    boolean hasNext()
    boolean hasNextInt()
    boolean hasNextDouble()
    String next()
    int nextInt()
    double nextDouble()
    String nextLine()
    Scanner useDelimiter(String regex)
```

STANDARD CLASSES AND INTERFACES – SUPPLEMENTAL REFERENCE

Package `java.util.function`

```
Interface BiConsumer<T,U>
    void accept(T t, U u)

Interface BiFunction<T,U,R>
    R apply(T t, U u)

Interface BiPredicate<T,U>
    boolean test(T t, U u)

Interface Consumer<T>
    void accept(T t)

Interface Function<T,R>
    R apply(T t)

Interface Predicate<T>
    boolean test(T t)

Interface Supplier<T>
    T get()
```

UIL COMPUTER SCIENCE WRITTEN TEST – 2025 INVITATIONAL A

Note: Correct responses are based on **Java SE Development Kit 22 (JDK 22)** from Oracle, Inc. All provided code segments are intended to be syntactically correct, unless otherwise stated (e.g., "error" is an answer choice) and any necessary Java SE 22 Standard Packages have been imported. Ignore any typographical errors and assume any undefined variables are defined as used. **For all output statements, assume that the System class has been statically imported using: `import static java.lang.System.*;`**

Question 1	
Which of the following is not equivalent to the expression $437_8 + 10101_2$?	
A) 10310_4 B) 464_8 C) 134_{16} D) 100110100_2 E) All are equivalent	
Question 2	
What is output by the code to the right?	
A) 55 B) 11 C) 7 D) 19 E) There is no output due to a compile error.	<code>out.println(3+4 % 1+2 * 5+6);</code>
Question 3	
What is output by the code to the right?	
A) 2.346 B) 2.34567 C) 2.34 D) 2.345 E) There is no output due to a runtime error.	<code>out.printf("%.3f",2.34567);</code>
Question 4	
What is output by the code to the right?	
A) BackRiblis B) BackRilis C) yBackRibilis D) yBackRiilis E) There is no output due to a runtime error.	<code>String a = "Chilis";</code> <code>String b = "BabyBackRibs";</code> <code>b = b.substring(3, 11);</code> <code>a = b + a.substring(2);</code> <code>out.println(a);</code>
Question 5	
What is output by the code to the right?	
A) true B) false C) There is no output due to a syntax error.	<code>boolean a = true;</code> <code>boolean b = a ^ !a;</code> <code>a = a b & !a !b;</code> <code>out.println(a);</code>
Question 6	
What is output by the code to the right?	
A) 3 B) 2.5 C) 3.0 D) 2.0 E) There is no output due to a runtime error.	<code>double a = 2.45;</code> <code>out.println(Math.ceil(a));</code>
Question 7	
What is output by the code to the right?	
A) 212 B) 112 C) 1212 D) 211 E) There is no output due to a runtime error.	<code>int i = 10;</code> <code>if(i++ == 11)</code> <code> out.print(1);</code> <code>else if(i++ == 11);</code> <code> out.print(2);</code> <code>out.println(i);</code>
Question 8	
What is output by the code to the right?	
A) 864 B) -14 C) 513 D) 14 E) There is no output due to a runtime error.	<code>int a = 17 - 8 * 3;</code> <code>int b = a + 11 / 2;</code> <code>out.println(a * b);</code>

Question 9 How many *s are output by the code to the right? A) 27 B) 33 C) 29 D) 30 E) There is no output due to a runtime error.	<pre>for(int y = 0; y < 12; y++) for(int c = 1; c < y; c *= 2) out.print("*"); out.println();</pre>
Question 10 What is the output by the code to the right? A) 55 B) 67 C) 7 D) There is no output due to a compile error. E) There is no output due to a runtime error.	<pre>int[] i = new int[] { 17, 12, 9, 8, 39, 3 }; i[2] += i[4]; i[1] -= i[3]; int b = i[2]; b += i[1] + i[5]; out.println(b);</pre>
Question 11 Which of the following packages contains the File class? A) java.lang.* B) java.awt.* C) java.util.* D) java.io.* E) None of the above.	
Question 12 What is output by the code to the right? A) 456 B) 106 C) 561 D) 121 E) There is no output due to a runtime error.	<pre>int sum = 1; for(int y = 0; y < 15; y++) for(int x = 0; x < y; x++) sum += x; out.println(sum);</pre>
Question 13 What is the order of precedence for the operators to the right? A) II, IV, III, I B) IV, II, I, III C) IV, II, III, I D) III, II, IV, I E) II, IV, I, III	I. (logical) II. ++ (post) III. & (bitwise) IV. -- (pre)
Question 14 What is output by the code to the right? A) 8 B) 64 C) 16 D) 32 E) There is no output due to a runtime error.	<pre>out.println(Integer.SIZE);</pre>
Question 15 What is the output by the code to the right? A) [B, C, D] B) [D, C, A] C) [A, C, D] D) [D, B, A] E) There is no output due to a compile error.	<pre>ArrayList<String> a; a = new ArrayList<String>(); a.add("A"); a.add("B"); a.add("C"); a.remove(1); a.add("D"); out.println(a);</pre>
Question 16 What is output by the code to the right? A) 1234ABCD B) [Ljava.lang.String;@156643d4 C) Output cannot be determined until runtime. D) There is no output due to a compile error. E) There is no output due to a runtime error.	<pre>String s = "1234ABCD"; char[] c = s.toCharArray(); out.println(c);</pre>

<p>Question 17</p> <p>What is output by the code to the right?</p> <p>A) X = 81 B) X = X C) 0 = X D) X = 88 E) There is no output due to a runtime error.</p>	<pre>char A = 'X'; int B = 81; out.print(B < A ? A : 0); out.print(" = "); out.print(B > A ? B : A);</pre>
<p>Question 18</p> <p>What is output by the line marked //q18 in the client code to the right?</p> <p>A) [5, 9, 13, 17, 25, 1] B) [1, 5, 9, 13, 17, 25] C) [17, 25, 1, 5, 9, 13] D) [13, 17, 25, 1, 5, 9] E) There is no output due to a runtime error.</p>	<pre>ArrayList<Integer> a; a = new ArrayList<Integer>(); for(int y = 1; y < 30; y += 4) a.add(y); Collections.rotate(a, -3); a.remove(2); a.remove(3); out.println(a); //q18 a.add(212); a.removeIf(x -> x % 3 == 2); out.println(a); //q19</pre>
<p>Question 19</p> <p>What is output by the line marked //q19 in the client code to the right?</p> <p>A) [13, 21, 1, 9] B) [17, 5, 212] C) [13, 25, 1, 9] D) [21, 25, 1, 9, 13] E) There is no output due to a runtime error.</p>	
<p>Question 20</p> <p>What is output by the code to the right?</p> <p>A) 117 B) 81 C) 165 D) 80 E) There is no output due to a runtime error.</p>	<pre>out.println(17 45 ^ 74 & 88);</pre>
<p>Question 21</p> <p>What is output by the line marked //q21 in the client code to the right?</p> <p>A) 8 B) 13 C) 12 D) 5 E) There is no output due to a runtime error.</p>	<pre>public int recur(int i) { if(i < 0) return 1; if(i % 5 < 2) return recur(i - 2) + recur(i - 3); else return recur(i - 2); } //////////client code////////// out.println(recur(10)); //q21 out.println(recur(32)); //q22 out.println(recur(51)); //q23</pre>
<p>Question 22</p> <p>What is output by the line marked //q22 in the client code to the right?</p> <p>A) 987 B) 128 C) 465 D) 37 E) There is no output due to a runtime error.</p>	
<p>Question 23</p> <p>What is output by the line marked //q23 in the client code to the right?</p> <p>A) 7739 B) 616 C) 2048 D) 28657 E) There is no output due to a runtime error.</p>	

<p>Question 24</p> <p>What could replace <1*> in the code to the right so that the A class compiles and functions as intended?</p> <p>A) self.i = i; self.s = s;</p> <p>B) this.i = i; this.s = s;</p> <p>C) i = i; s = s;</p> <p>D) super(i,s);</p> <p>E) More than one of the above.</p>	<pre> class A{ int i; String s; public A(int i, String s) { <1*> } public int add() { return ++i; } public String toString() { return s+" "+i; } } class B extends A{ public B(String s) { <2*>; } public int add() { i += 2; super.add(); return i; } } //////////client code////////// A a = new A(3, "a"); B b = new B("b"); A c = new B("c"); String o = "" + a.add(); o += " " + b.add(); o += " " + c.add(); out.println(o); //q26 c.add(); c.add(); out.println(c); //q27 </pre>
<p>Question 25</p> <p>What could replace <2*> in the code to the right so that the B class compiles and functions as intended, initializing the i instance variable with value 7?</p> <p>A) super(s, 7);</p> <p>B) super.A(7, s);</p> <p>C) super(7, s);</p> <p>D) super.A(s, 7);</p> <p>E) super();</p>	
<p>Question 26</p> <p>What is the output by the line marked //q26 in the client code to the right?</p> <p>A) 4 10 10</p> <p>B) 4 10 8</p> <p>C) 4 8 8</p> <p>D) 3 7 7</p> <p>E) There is no output due to a compile error.</p>	
<p>Question 27</p> <p>What is the output by the line marked //q27 in the client code to the right?</p> <p>A) c 10</p> <p>B) c 16</p> <p>C) c 14</p> <p>D) There is no output due to a compile error.</p> <p>E) There is no output due to a runtime error.</p>	
<p>Question 28</p> <p>What is the output by the code to the right?</p> <p>A) true</p> <p>B) false</p> <p>C) Output cannot be determined until runtime.</p> <p>D) There is no output due to a compile error.</p> <p>E) There is no output due to a runtime error.</p>	<pre> String s1 = "H3llo Th3r3!"; String s2 = "H..{2,4}\\S..{2,5}"; s1 = "" + s1.matches(s2); out.println(s1); </pre>

<p>Question 29</p> <p>What could replace <code><?*></code> in the code to the right so that the code compiles and executes as intended?</p> <p>A) add B) push C) append D) A and B. E) Any of the above.</p>	<pre>Stack<String> stack; stack = new Stack<String>(); stack.<?*>("Blue"); stack.<?*>("Purple"); stack.<?*>("Orange"); stack.pop(); stack.<?*>("Green"); stack.pop(); stack.<?*>("Yellow"); stack.<?*>("Red"); stack.pop(); out.println(stack);</pre>
<p>Question 30</p> <p>What is the output by the code to the right?</p> <p>A) [Purple, Orange, Red] B) [Green, Yellow, Red] C) [Purple, Red, Yellow] D) [Blue, Purple, Yellow] E) There is no output due to a compile error.</p>	
<p>Question 31</p> <p>Assume that the elements to the right are inserted into an Unbalanced Binary Search Tree where duplicate elements are not added to the tree.</p> <p>How many internal nodes will the tree have?</p> <p>A) 15 B) 13 C) 10 D) 16 E) 9</p>	
<p>Question 32</p> <p>Under the same assumption as Question 31, how many leaf nodes will the tree have?</p> <p>A) 1 B) 5 C) 3 D) 4 E) 7</p>	
<p>Question 33</p> <p>Under the same assumption as Question 31, what is the diameter of the tree?</p> <p>A) 8 B) 6 C) 9 D) 10 E) 4</p>	
<p>Question 34</p> <p>Under the same assumption as Question 31, what is the worst-case time complexity for the operation <code>search()</code> in an Unbalanced Binary Search Tree? You may assume that n is the number of elements in the tree.</p> <p>A) $O(n)$ B) $O(n^2)$ C) $O(n)$ D) $O(\sqrt{n})$ E) $O(n)$</p>	<p>34, 86, 28, 29, 33, 14, 52, 31, 92, 14, 15, 92, 31, 92, 105, 95, 97, 118</p>

Question 35

Which of the following could replace **<1*>** to ensure that any classes that are stored as data within this data structure are compatible with the Comparable interface?

- A) extends
- B) implements
- C) requires
- D) Either A or B.
- E) None of the above.

Question 36

Which of the following lines of code could replace **<2*>** so that the function peek() properly returns the value of the data stored in head?

- A) return head.data
- B) return this.head.data
- C) return this.head
- D) Either A or B.
- E) All of the above.

Question 37

Which of the following well-known data structures is the class DataStruct an implementation of?

- A) LinkedList
- B) Queue
- C) Stack
- D) Vector
- E) Deque

Question 38

Which of the following classes would not be able to be stored within this data structure?

- A) Integer
- B) String
- C) BigInteger
- D) double[]
- E) None of the above.

```
public class DataStruct<T <1*> Comparable<T>> {  
    private class Node {  
        public T data;  
  
        public Node next;  
  
        public Node(T d, Node n) {  
            this.data = d;  
            this.next = n;  
        }  
    }  
  
    private Node head;  
  
    private int size;  
  
    public DataStruct() {  
        this.size = 0;  
        this.head = null;  
    }  
  
    public T peek() {  
        if(head == null) {  
            return null;  
        }  
        <2*>  
    }  
  
    public T pop() {  
        T data = this.head.data;  
        this.head = this.head.next;  
        this.size--;  
        return data;  
    }  
  
    public T push(T data) {  
        Node newHead = new  
            Node(data, this.head);  
        this.head = newHead;  
        this.size++;  
        return data;  
    }  
  
    public int size() {  
        return size;  
    }  
}
```

Question 39

Evaluate the following postfix expression. Assume that the \wedge operator refers to the power operator, and that $/$ is performed as integer division.

252 42 36 - 2 \wedge / -2 -34 89 + * +

Question 40

Determine the longest simple cycle in the undirected graph to the right. Note that if multiple such solutions exist, chose the one that is lexicographically first.
