

CS344M

Autonomous Multiagent Systems

Patrick MacAlpine

Department of Computer Science
The University of Texas at Austin

Good Afternoon, Colleagues

Are there any questions?

Good Afternoon, Colleagues

Are there any questions?

- How does self-interest relate to coordination?

Good Afternoon, Colleagues

Are there any questions?

- How does self-interest relate to coordination?
- What is special/proprietary about Kiva?

Good Afternoon, Colleagues

Are there any questions?

- How does self-interest relate to coordination?
- What is special/proprietary about Kiva?
- Why not treat resource allocation as an optimization problem?

Good Afternoon, Colleagues

Are there any questions?

- How does self-interest relate to coordination?
- What is special/proprietary about Kiva?
- Why not treat resource allocation as an optimization problem?
- What happens if power goes out in AIM?

Good Afternoon, Colleagues

Are there any questions?

- How does self-interest relate to coordination?
- What is special/proprietary about Kiva?
- Why not treat resource allocation as an optimization problem?
- What happens if power goes out in AIM?
- Further work on AIM?

Good Afternoon, Colleagues

Are there any questions?

- How does self-interest relate to coordination?
- What is special/proprietary about Kiva?
- Why not treat resource allocation as an optimization problem?
- What happens if power goes out in AIM?
- Further work on AIM?
- Can AIM be done without a central controller?

Good Afternoon, Colleagues

Are there any questions?

- How does self-interest relate to coordination?
- What is special/proprietary about Kiva?
- Why not treat resource allocation as an optimization problem?
- What happens if power goes out in AIM?
- Further work on AIM?
- Can AIM be done without a central controller?
- Why not just use collision avoidance (Clearpath) for cars?

Logistics

- Surveys — keep them coming

Logistics

- Surveys — keep them coming

Proposals

- Overall, very good!

Proposals

- Overall, very good!
- A few common problems:

Proposals

- Overall, very good!
- A few common problems:
 - No clear intro / problem statement

Proposals

- Overall, very good!
- A few common problems:
 - No clear intro / problem statement
 - Lots of “what” but very little “how”...

Proposals

- Overall, very good!
- A few common problems:
 - No clear intro / problem statement
 - Lots of “what” but very little “how”...
 - ...or too much how without identifying the challenges

Proposals

- Overall, very good!
- A few common problems:
 - No clear intro / problem statement
 - Lots of “what” but very little “how”...
 - ...or too much how without identifying the challenges
 - No clear description of how you would evaluate success

Proposals

- Overall, very good!
- A few common problems:
 - No clear intro / problem statement
 - Lots of “what” but very little “how”...
 - ...or too much how without identifying the challenges
 - No clear description of how you would evaluate success
 - Too much proposed

Proposals

- Overall, very good!
- A few common problems:
 - No clear intro / problem statement
 - Lots of “what” but very little “how”...
 - ...or too much how without identifying the challenges
 - No clear description of how you would evaluate success
 - Too much proposed
 - Not enough to convince me that it will work

Proposals

- Overall, very good!
- A few common problems:
 - No clear intro / problem statement
 - Lots of “what” but very little “how” . . .
 - . . . or too much how without identifying the challenges
 - No clear description of how you would evaluate success
 - Too much proposed
 - Not enough to convince me that it will work
 - Provide more specific steps/plans

Proposals

- Overall, very good!
- A few common problems:
 - No clear intro / problem statement
 - Lots of “what” but very little “how”...
 - ...or too much how without identifying the challenges
 - No clear description of how you would evaluate success
 - Too much proposed
 - Not enough to convince me that it will work
 - Provide more specific steps/plans
 - Very little organization- sections

Proposals

- Overall, very good!
- A few common problems:
 - No clear intro / problem statement
 - Lots of “what” but very little “how”...
 - ...or too much how without identifying the challenges
 - No clear description of how you would evaluate success
 - Too much proposed
 - Not enough to convince me that it will work
 - Provide more specific steps/plans
 - Very little organization- sections
 - Writing is communication

- Revise (and visit Carlos at the writing center)
- Comments both from me and Sanmit

Progress reports

- Those considering machine learning and using condor... may be time-consuming

Progress reports

- Those considering machine learning and using condor... may be time-consuming
- Gather resources early

Progress reports

- Those considering machine learning and using condor... may be time-consuming
- Gather resources early
 - Will provide SCRAM role assignment code

Progress reports

- Those considering machine learning and using condor... may be time-consuming
- Gather resources early
 - Will provide SCRAM role assignment code
 - Will add scripts for using condor

Progress reports

- Those considering machine learning and using condor... may be time-consuming
- Gather resources early
 - Will provide SCRAM role assignment code
 - Will add scripts for using condor
 - Probably add basic comm protocol for 3D

Progress reports

- Those considering machine learning and using condor... may be time-consuming
- Gather resources early
 - Will provide SCRAM role assignment code
 - Will add scripts for using condor
 - Probably add basic comm protocol for 3D
 - Ask!

Progress reports

- Those considering machine learning and using condor... may be time-consuming
- Gather resources early
 - Will provide SCRAM role assignment code
 - Will add scripts for using condor
 - Probably add basic comm protocol for 3D
 - Ask!
- Will be stricter on progress reports

Progress reports

- Those considering machine learning and using condor... may be time-consuming
- Gather resources early
 - Will provide SCRAM role assignment code
 - Will add scripts for using condor
 - Probably add basic comm protocol for 3D
 - Ask!
- Will be stricter on progress reports
 - Be more realistic

Progress reports

- Those considering machine learning and using condor... may be time-consuming
- Gather resources early
 - Will provide SCRAM role assignment code
 - Will add scripts for using condor
 - Probably add basic comm protocol for 3D
 - Ask!
- Will be stricter on progress reports
 - Be more realistic
 - Be much more specific

Progress reports

- Those considering machine learning and using condor... may be time-consuming
- Gather resources early
 - Will provide SCRAM role assignment code
 - Will add scripts for using condor
 - Probably add basic comm protocol for 3D
 - Ask!
- Will be stricter on progress reports
 - Be more realistic
 - Be much more specific
 - May reflect side forays

Progress reports

- Those considering machine learning and using condor... may be time-consuming
- Gather resources early
 - Will provide SCRAM role assignment code
 - Will add scripts for using condor
 - Probably add basic comm protocol for 3D
 - Ask!
- Will be stricter on progress reports
 - Be more realistic
 - Be much more specific
 - May reflect side forays
 - Have **something** implemented and evaluated

Progress reports

- Those considering machine learning and using condor... may be time-consuming
- Gather resources early
 - Will provide SCRAM role assignment code
 - Will add scripts for using condor
 - Probably add basic comm protocol for 3D
 - Ask!
- Will be stricter on progress reports
 - Be more realistic
 - Be much more specific
 - May reflect side forays
 - Have **something** implemented and evaluated
 - Return proposals with it - revise/fix based on proposal feedback
