Good Morning, Colleagues

Good Morning, Colleagues

Are there any questions?

Logistics

- Material from optional classes

Logistics

- Material from optional classes
- Midterm on Thursday

Logistics

- Material from optional classes
- Midterm on Thursday
 - Open book and open note; no electronic devices

Logistics

- Material from optional classes
- Midterm on Thursday
 - Open book and open note; no electronic devices
 - Cheating has to be penalized ruthlessly

Logistics

- Material from optional classes
- Midterm on Thursday
 - Open book and open note; no electronic devices
 - Cheating has to be penalized ruthlessly
 - Why?

Logistics

 - Why?
- Survey past due

Survey Results

- Will respond fully after midterm (or on piazza)

Survey Results

- Will respond fully after midterm (or on piazza)
- Primary component of my utility function: you well you learn the material

Survey Results

- Will respond fully after midterm (or on piazza)
- Primary component of my utility function: you well you learn the material
- Secondary component: that you find the material and the process of learning it straightforward and interesting.

Survey Results

- Will respond fully after midterm (or on piazza)
- Primary component of my utility function: you well you learn the material
- Secondary component: that you find the material and the process of learning it straightforward and interesting.
- More minor: comfort with grades

Survey Results

- Will respond fully after midterm (or on piazza)
- Primary component of my utility function: you well you learn the material
- Secondary component: that you find the material and the process of learning it straightforward and interesting.
- More minor: comfort with grades
- Not a part: how hard you have to work or you think I work

Pending Questions

- What stops node from having infinite neighbors?
- Can you tell if a structure will be sparse
- Why a "partial" ordering?
- Can there cycles?
- "Can't violate axioms of prob."?
- Conditionl dep. diagrams (Markov blanket)
- (Leak node?)
- ("Canonical dist." (vs. $O(2^k)$))
- when discretize vs. param vs. non-param?
- Probit vs. logit
