Autonomous Multiagent Systems

Peter Stone

Week 7, Thursday (10/10)

Any Questions?

- About the final project?
- How was the programming assignment?
- Neural networks

Crash course on machine learning

- Genetic algorithms/programming
- Neural networks
- Reinforcement learning

Search through a space of hypotheses

Searching through hypothesis space

$\boxed{\text{There's no magic}}$

GA/GP: randomized hill-climbing

NN: gradient descent

RL: policy search
