

## CS 327E Final Project: Milestone 5

### Prerequisites:

1. Completed Milestone 4.
2. Continuing to work with your partner.

Together with your partner, give a joint presentation of your project work. You should present only the key points and interesting aspects as this is intended to be a **short** presentation lasting only 10 minutes. Feel free to prepare some slides if you feel it would help in presenting your work. You can also demonstrate your work, explaining aspects as you go. You will be presenting to the instructor and TAs alone, not to the entire class.

Note that the 10-minutes includes the setup time at the start (~1 minute), the actual presentation time, and the Q&A session at the end (~2 minutes). Make sure to practice your presentation and be right at the 7-minute mark, as there will be a hard cut-off.

The presentations will happen over 5 evenings starting on Monday 12/04 and ending on Monday 12/11. Consult the presentation schedule to see your assigned time slot. Also, note the **location** of your presentation since the room will not be our normal classroom on Tuesday and Thursday.

The presentation schedule is available at this link: <https://tinyurl.com/yabzeyrm>
