

# Submitting a CS314 Programming Assignment to GradeScope Via Canvas

This guide explains how to submit source code (.java files) to GradeScope via Canvas for CS314 Programming Assignments'.

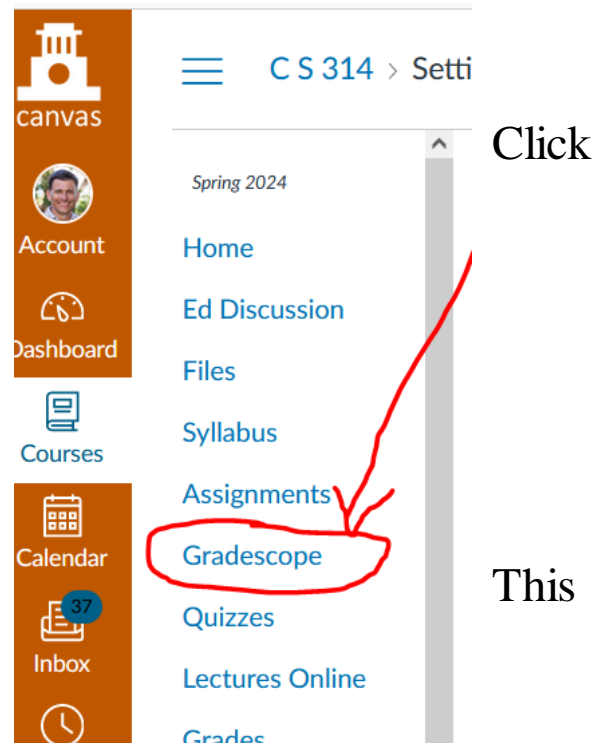

0. You must access GradeScope via the CS314 Canvas assignment.

Do not go directly the GradeScope page or attempt to create a new GradeScope account. Like, Canvas, you can submit as many times as you like before the deadline. If you submit after the regular deadline your TA will assess the appropriate number of slip days.

1. Go to Canvas and the CS314 course.

2. on the

GradeScope link in the left menu. takes you to the GradeScope page for CS314.

# Submitting a CS314 Programming Assignment to GradeScope Via Canvas

4. Click on the appropriate assignment.

C S 314 | Spring 2024  
Course ID: 716277  
No Published Grades

Description: Data Structures  
Things To Do: Review and publish grades for \*TESTER\* A0 now that you're all done grading.

Active Assignments	Released	Due (CST)	Submissions	% Graded	Published	Regrades
Programming Assignment 6	FEB 28, 2024 11:00 PM	MAR 7, 2024 11:01 PM Late Due Date: MAR 9, 2024 11:02 PM	3	33%	OFF	3

5. A web page or dialog box will appear similar to this:

## Submit Programming Assignment

Upload all files for your submission

Submission Method

Upload  GitHub  Bitbucket

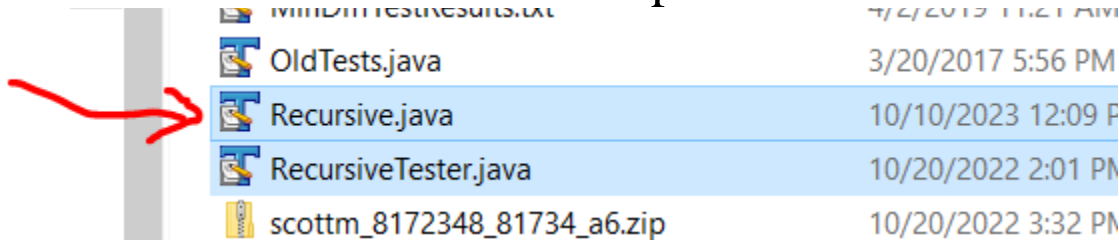

Drag & Drop  
Any file(s) including .zip. Click to browse.

Cancel Upload

6. You can drag and drop all required files or click on the "Drag & Drop" box to browse to the files you want to upload.

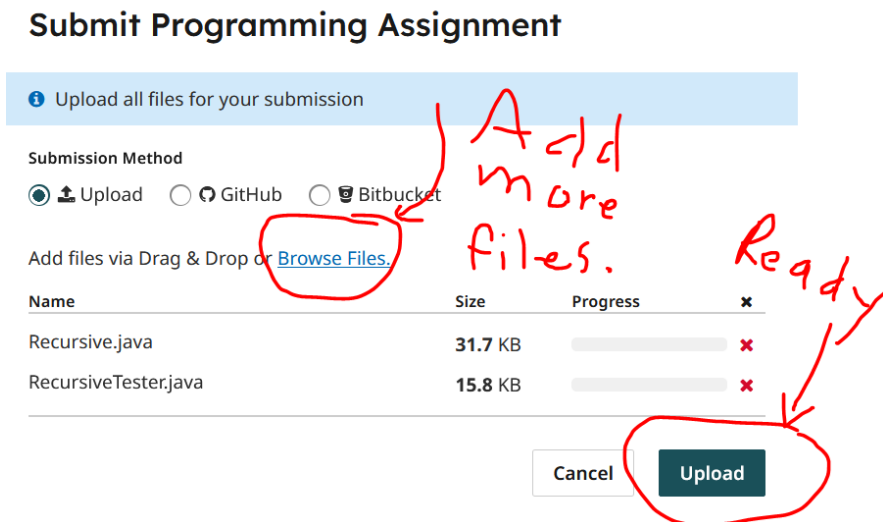

Note, you are turning in all required files, not a zip file.

# Submitting a CS314 Programming Assignment to GradeScope Via Canvas

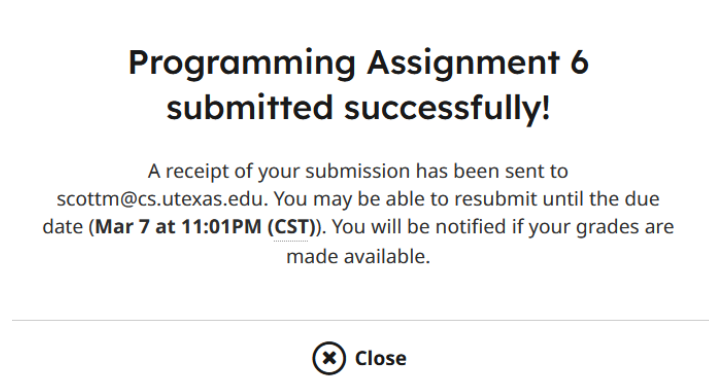

On a Windows machine hold down the control (ctrl) key to select multiple files at once with the mouse. On an Apple machine hold down the command key.

7. When you have uploaded the files you will see a display similar to this:

8. You can add more files from your machine by clicking the "Browse Files" link. When ready to submit, click "Upload" button.

The files will upload.

9. Gradescope will now run the tester on your program. If there is an issue due to an issue such as syntax errors, bad imports, unnecessary package statements, etc. Gradescope will notify you so you can attempt to fix the issue and resubmit.

If you have questions or issues you can:

- Post them to the Ed Discussion for the course.
- See Mike or a TA in help hours.
- Check this page for more guidance.
